

Carbon stored in wood and agricultural residues

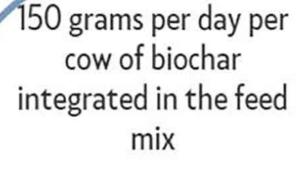

Net Zero Agro-feed Innovator

1 ton of Biochar

Upgrade organic feedstock to high-valued carbon products by IP-owned carbonisation technology

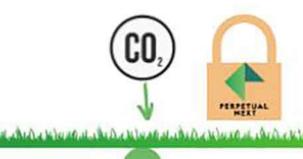

Carbon mixes with the soil:

- Nutrient rich manure
- Less stench
- Less eutrophication

ground
 2.7 tons CO2
 extracted by every
 ton of biochar

Carbon captured in the

- 18 cows 1 year
- Increased health
- Increased feed efficiency
 Increased meat and milk quality
- Lowers methane emissions by 12.7%
