
Natural carbon capture by trees and agricultural crops

Carbon stored in wood and agricultural residues

Biological Cattle farmer

PERPETUAL NEXT

Biochar added to the manure

Biochar production

Upgrade organic feedstock to high-valued carbon products by IP-owned carbonisation technology

Carbon rich manure

- Increased nutrient values
- Less greenhouse gas emissions
- Less stench
- Less eutrophication

Carbon captured in the ground
2,7 tons of CO2 removal per ton of Biochar

High-valued carbon removal certificates derived from biochar application
