

- **Note 1:** Data presented is from plant scale (C-Vert R1) runs and measurements covering a few ligneous species.
- **Note 2:** Carbonisation temperature refers to zone 4 (last heating zone in set up), average temperature maintained with a residence time of minimum 10 min.
- **Note 3:** 'As received' are actual measured values in product and 'dry, ash free' are calculated values assuming no moisture nor ash.
